

Florence Cathedral

Description

The Florence Cathedral, or Cathedral of Santa Maria del Fiore, is one of the largest buildings of medieval Europe and a UNESCO World Heritage Site. It was constructed in 1296 as the city's second cathedral to accommodate the growing population. As of today, it is the third-largest church in the world. Its most peculiar dome requires the visitors to climb 463 steps to reach the top of the 114.5 meters high cupola, where they will be awarded astonishing panoramic views of Florence.
